Product & Business Analytics | Statistics Graduate | SQL • Power BI • Flutter

PROFESSIONAL SUMMARY

Statistics graduate (Ege University, June 2026) based in Istanbul, working at the intersection of product and analytics in consumer tech. One year of commercial experience owning an outbound funnel end-to-end — tracking stage-by-stage conversion across 180 accounts — plus internships in statistical analysis and enterprise systems. Alongside this I design and build my own mobile product, running the full cycle from user research and PRD to MVP, testing and iteration. Comfortable with SQL, Power BI and regression modelling, and used to turning messy, multi-source data into decisions non-technical stakeholders can act on.

CORE SKILLS

Product: Problem Discovery, User Research & Interviews, PRD Writing, MVP Definition, Roadmap Prioritisation, User Testing & Iteration, A/B Testing and Experiment Design, Competitive & Market Research

Data & Analytics: SQL (data extraction & manipulation), Power BI, Advanced Excel, Oracle Data Integrator, Statistical Modelling & Regression, KPI Monitoring, Funnel & Conversion Analysis, Acquisition & Retention Metrics, Root-Cause Analysis, Data Cleaning & Validation, Large Dataset Handling

Technical & Ways of Working: Flutter/Dart, Mobile App Architecture, REST API Concepts, AI-Assisted Development (Claude API), HubSpot CRM, Agile/Scrum Awareness, Cross-Functional Collaboration, Stakeholder Communication & Presentation

PROFESSIONAL EXPERIENCE

Auratech Consultancy — Junior Business Development Specialist İzmir / Remote | 08/2024 – 08/2025
Energy efficiency consulting, B2B

- Owned the outbound funnel as a measurable KPI set: 180 target accounts → 100 meetings → ~20 proposal-stage opportunities in one year, monitoring stage-by-stage conversion and open rates in HubSpot CRM to decide where to reallocate effort.
- Built a prospect database of 180 companies and 2,000+ executive contacts from scratch, defining the segmentation criteria (branch count, sector, consumption profile) used to prioritise the pipeline.
- Ran the data collection behind free pre-sales efficiency analyses: gathered branch-level electricity and water consumption data from clients, chased missing records, and cleaned/validated broken spreadsheets and invoice photos into analysis-ready datasets.
- Translated analysis output into value presentations for C-level stakeholders, contributing to a service agreement with one of Türkiye's largest banks.

GOERZ-IT — SAP Consultant Intern İstanbul / On-Site | 07/2024 – 08/2024

- Supported SAP SD & MM module configuration and documented B2B process flows — hands-on exposure to how transactional systems capture and structure business data.

Ministry of Education, Konak Directorate — Statistical Analyst Intern İzmir / On-Site | 07/2023 – 08/2023

- Processed and validated large-scale educational datasets for official reporting, running consistency and accuracy checks across sources before publication.

PROJECTS

GrammarLens — AI-Powered Grammar Coach | Personal Product Case Study 2026 – Present

- Built a Flutter/Dart mobile app on the Claude API that analyses users' own written sentences and tracks their recurring error patterns, aimed at fluent-but-informal English learners.
- Ran the full product cycle solo: user research with 4 participants → PRD → MVP → user testing → two iteration cycles, including a Material 3 redesign driven by test feedback.
- Made batching a core design decision to keep per-user API cost predictable — a real trade-off between latency and unit cost. Repo and documentation: github.com/svactrion/GrammarLens

EDUCATION

Ege University — BSc in Statistics İzmir | Graduated 06/2026

- Thesis: modelled Consumer Price Index (CPI) trends using statistical regression analysis.

TRAINING & CERTIFICATIONS

Intellica Data Summer Camp (06/2024) — SQL and Oracle Data Integrator applied to real business intelligence case studies.

Digital Marketing Bootcamp, Techcareer.net (2025) — acquisition funnels, conversion metrics and retention analysis across the user journey.

Product Management Bootcamp, Coderspace (2025) — discovery, prioritisation, A/B testing and experiment design. | **Flutter Mobile Development Bootcamp, Techcareer.net** (2025).

LEADERSHIP & LANGUAGES

Community Manager, Ege University AI Community (2022–2023) — co-organised a university-wide AI & Technology conference for 100+ participants as the single point of contact across speakers, faculty and students.

Languages: Turkish (Native) | English (B2/C1, IELTS in progress)
